

Flying Leads

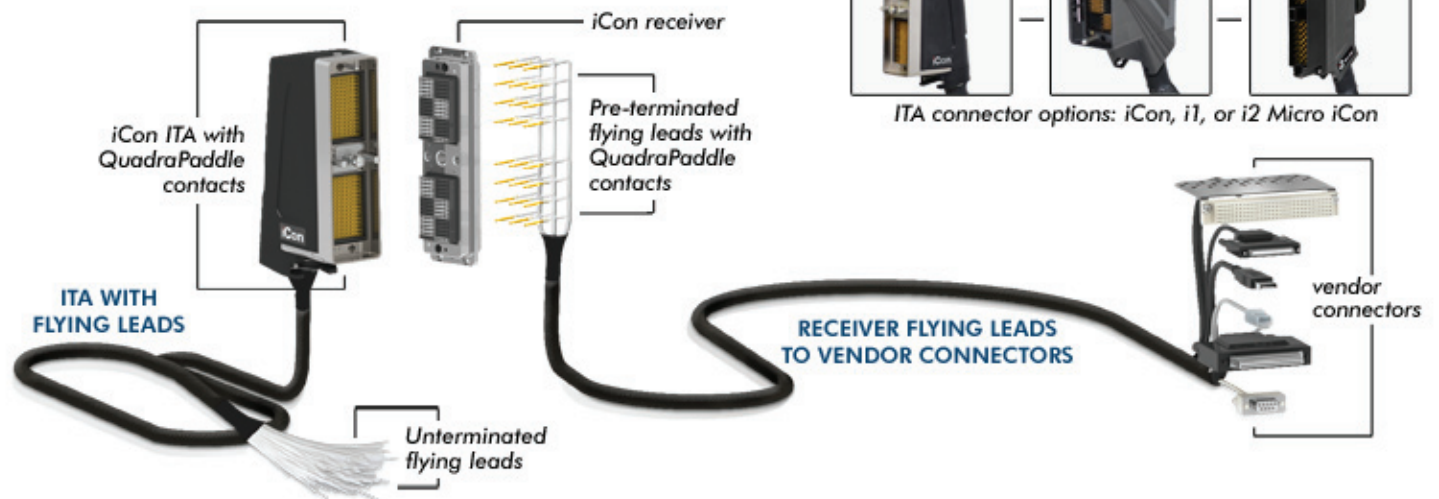

Flying Lead Cable Assemblies

Our iSeries Cable Assemblies allow you to pin your own configuration. Choose from iCon, i1, or i2 Micro iCon ITA connectors for your ideal I/O level and footprint using VPC's QuadraPaddle™ Signal Technology. Hybrid versions offer signal, power and coax combined in one assembly.

Flying Lead Receiver Patchcords

Complete your solution with flying lead receiver patchcords. Standard solutions include, SCSI, DSub, RJ45 and USB.

iCon flying lead cable assembly pictured below.

Features and Benefits

- Receiver Side - Consolidate Multiple Connectors into a Single iSeries Connector
- ITA Side - Unterminated Flying Leads enable termination and pinning to your specifications
- QuadraPaddle Signal Technology enables up to 5 Amps per contact and 320 signal points per connector

- Rugged iSeries connectors endure more than 10,000 cycles
- Hybrid iCon and i1 enable mixing of various I/O - signal, power, coax, fiber optic, and pneumatic
- Hybrid i2 Micro iCon enables mixing of signal, power, coax
