

Sloped Enclosures

for G12, G12x and 9025TR

Sloped enclosures offer various customization features for test and measurement connection needs.

Features and Benefits

- Top and front panels can be removed for easy access to wiring
- Front panel can be swapped out so the enclosure can be used on different ITAs
- Gas piston can be mounted on left, right or both sides for easy opening and closing of top lid
- Easy access with secure latching mechanism
- Better ergonomics - easier access to connectors on top of the enclosure
- Top panel allows for endless cutout options for secondary connectors
