VPC 3D Models are intended to aid customers in product application and overall solution design. Critical details necessary for this purpose remain in customer-available 3D models, drawings and files.

However, VPC does not guarantee that the information offered in customer-available product assets are exact and/or precise. For the purpose of maintaining product-related proprietary information, some details may have been omitted. For the most comprehensive results, VPC recommends using 3D models in conjunction with other customer-available assets including user manuals and product drawings.
