

# iSeries ITAs XL LINE

Modern devices typically include high speed digital interfaces. In addition, there are an increasing number of high power applications in the aerospace, defense, and automotive markets. VPC has responded with the XL Line of iSeries handheld connector solutions, designed to accommodate the larger cable bundles these applications often require. VPC's XL Line of ITAs offers larger diameter cable exits and the XL versions of the iCon, i2 Micro ICon, and i2 MX offer XL-sized backshells for a larger cable bend radius area. Despite their XL size, these still mate to standard receivers.

- XL Backshell & Cable Exit
- 1.67" max cable bundle diameter
- 1" min cable bend radius
- EMI- shielded
- Nickel-plated aluminum housing
- 10,000 cycles

i2 XL

iCon XL

- XL Backshell & Cable Exit
- 1.95" max cable bundle diameter
- 1" min cable bend radius
- EMI- shielded
- 10,000 cycles

i1 XL

- XL Cable Exit
- 1.26" max cable bundle diameter
- Glass Reinforced Thermoplastic
- 10,000 cycles

- XL Backshell & Cable Exit
- 1.67" max cable bundle diameter
- 1" min cable bend radius
- Nickel-plated aluminum housing
- 10,000 cycles
