

# Pull-Thru SOLUTIONS

VPC's Pull-Thru interfaces deliver reliable performance in an innovative platform. Designed on 0.80" (20.32 mm) centers to correspond with PXI system slot requirements; the G20, G20x, and G40x systems provide the convenience of a direct connection to instrument modules, enabling pull through removal of connector modules and instrumentation from the chassis backplane.

VPC G20 Receiver

Pull-Thru Adapter- PCB

## Features & Benefits

- Unique "Pull-Thru" design with PXI Pull-Thru Adapters
- PCB or wired adapter solutions available
- Use VPC 90 Series modules
- Available in rack or slide mount
- EMI options
- 20,000 mating cycles
